**Attn: Respiratory Therapy Educators and Regulators**

January, 30<sup>th</sup>, 2016.

The CBRC is proud and excited to announce the implementation of a computer-based examination with the first writing July 4<sup>th</sup>, 2016.

The CBRC Board has worked diligently over the past several years researching computer-based testing as the Board felt this was essential to advance the examination process and adapt to future needs. The CBRC put out a request for proposals and received, reviewed and met with four companies, both Canadian and International. After careful consideration and investigation the Board decided that Yardstick most fully met the requirements of the CBRC.

The CBRC will continue to develop the examination while closely monitoring and evaluating the results.

Yardstick Testing and Training Experts [www.getyardstick.com](http://www.getyardstick.com) is a Canadian-based company. Through dedication to excellence Yardstick has grown into Canada's leader in computer based testing and training. Yardstick currently administers licencing and certification exams for most of the health professions in Canada at hundreds of testing centres. Prior to the licencing exam, candidates will be provided with opportunities to familiarize themselves with the new exam interface through both a practice exam and a tutorial.

Please refer to the CBRC website [www.cbrc.ca](http://www.cbrc.ca) for changes to our application, registration and examination delivery process, paying special attention to key dates and deadlines.

As always the CBRC is happy to answer any questions.

Sincerely the CBRC Board of Directors

Julie C. Brown RRT  
Chair, Board of Directors  
Canadian Board for Respiratory Care
